

Database Developer

Scope: We are currently seeking a Database Developer/Designer to design, and implement a database system that is able to store organizational data and records. The Database Developer will work closely with end user on a day to day basis to refine, support, and streamline client records, documents, and data.

Responsibilities:

- The ability to configure and implement a platform that will supports and house current church/council membership data.
- Analyze data requirements from functional specifications; works with end users to fix bugs and implement enhancements within desired platform (Access, Excel etc.)
- Evaluates current database environments, conducts research, recommends, and implements innovate systems technology that can enhance the reliability, security, productivity, and efficiency of the database infrastructure.
- Designs and implements database and operating system security for client and server configurations
- Adheres to best practices for maintaining security and effectively controls access to data.
- Develops and maintains documentation of design and workflow of data structures.
- Contributes to and maintains technical database standards.
- Assists in other IT functions to troubleshoot critical business systems.
- Recommends solutions by comparing advantages and disadvantages of requested features and bugs based on knowledge

Qualifications:

- Experience in database development working with various platforms including SQL, Net Technologies, VB.Net, ASP.Net, C, C++, C#, Java, and or other selected languages
- High level of computer literacy with spreadsheets, word processing and database software and/or business systems (Word, Access, Excel, PowerPoint, MS Project, and graphic software.)
- Experience in troubleshooting and resolving the application developed with Microsoft Access.
- Must be able to operate autonomously with little supervision to achieve desired goals.
- High level of written communication and documentation skills.

Please contact Elder George Twilley, Sr @ 301-346-9041 or georged.twilley@verizon.net if interested.
